ABOUT ME

Passionate AI & Data Science Engineer skilled in Python, Java, Machine Learning, Deep Learning, NLP, and Computer Vision. Experienced in building end-to-end AI applications, model training, real-time inference, data preprocessing, and REST API development. Strong communicator with hands-on project experience in LLMs, YOLO, CNNs, analytics dashboards, and automation.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

N. K. Orchid College of Engineering & Technology, Solapur (2022–2026):65%

HSC – Walchand College of Arts & Science, Maharashtra Board (2020 2022):62.50%.

CBSE – Kendriya Vidyalaya Central Railway, Solapur (2010–2020):72.8%

INTERSHIP

AI & Decentralized Systems Internship – BlockseBlock (Aug 2025 – Oct 2025)

- Developed an NLP-powered essay evaluation system using LLaMA, reducing manual evaluation time by 60%.
- Created documentation and maintained GitHub repositories, improving onboarding efficiency by 25%.
- Contributed to Smart Finance AI, realizing a 15% increase in recommendation precision.

PROJECT

AI-Powered Surveillance System:

- Built a real-time surveillance pipeline using YOLOv8, OpenCV, Flask API, and a React dashboard.
- Accomplished 93% accuracy in crowd & fight detection; reduced incident response time by 30%.
- Integrated Socket.IO for live streaming and Power BI for analytics visualization

CARVIS-Car Assistant:

- Enhanced driver-safety using CNN models for drowsiness detection (92%) and traffic sign recognition (95%).
- Integrated real-time video processing, eye-blink detection, and voice feedback for safer driving.

Smart Finance AI – Personal Finance Optimization Assistant:

- Developed a finance-tracking pipeline with anomaly detection and personalized budget recommendations.
- Attained 15–25% budget optimization through statistical modeling and real-time insights.
- Built an interactive dashboard for monthly summaries & savings analysis.

Essay Feedback System (LLM-based)

- Implemented an AI tool using LLaMA to evaluate grammar, coherence, and structure.
- Reduced manual feedback effort by 70% through automated scoring and suggestions.

CERTIFICATIONS

- Java – Udemy (2023)
- Internet of Things Foundation – Infosys Springboard (2024)
- Corporate Skills Internship – Eminence (2023)
- Fundamentals of Deep Learning – NVIDIA (2025)
- Campus Recruitment Training Program (2025)

TECHNICAL SKILLS

Programming: Python, Java, HTML, CSS

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, YOLOv8

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib

Data & BI: Excel, Power BI, Tableau

Tools: Git, GitHub, VS Code, Cursor, Jupyter Notebook

Database: SQL

Core CS: DSA, OOP

Soft Skills: Communication, Problem-Solving, Teamwork

RESEARCH PAPER

Human-Centric SAR Image Colorization for Intuitive Geospatial Decision-Making

Conducted research on colorizing Synthetic Aperture Radar (SAR) images using human-centric approaches to enhance visual interpretability and support improved geospatial analysis and decision-making.

CARVIS: End-to-End Deep Learning Framework for Intelligent Car Assistance

Developed an end-to-end deep learning system for intelligent car assistance using computer vision techniques. Implemented lane detection and object recognition models to support real-time driving decisions and improve road safety

LEADERSHIP & ACTIVITIES

- Event Coordinator – AIASA Club, organized technical workshops & peer-learning sessions.
- Awarded Fresher of the Year (2024–25).

INTERESTS

Chess | Cricket | Photography | Coding
